

## **Nationwide AT&T Outages Information**

Agency of Digital Services (ADS) and Public Service Department (PSD) are aware of the reported nationwide AT&T outages. We are actively engaged in updates from AT&T and assessing the impact in Vermont. ADS has identified intermittent impact for some users and are working to identify and mitigate until full service is restored. AT&T has issued a statement that they are working urgently to restore service and encourage the use of Wi-Fi calling until service is restored.

See [AT&T outage page](#) for further information and resources.
